

Further into the future, there are community plans for possibly resurrecting an abandoned rail line to create a scenic light rail system. One section would pass adjacent to college property. This could be an opportunity for the State to create a stop and rail station near the intersection of Clinton Street and Daniels Road. Such a station could serve visitors to the college as well as students and staff.

In the short term, Skidmore should press for a sidewalk/bike path along Clinton Street to Daniels Road, to enable pedestrians and bicyclists to reach the Van Lennep Riding Center.
